Memorandum

To: Files

From: John Miley/Dave Oberwager

Subject: Tract U-a/U-b Inspection - Road Construction, Top Soil Stock Piles

Personnel Present

Dave Oberwager - OSO
John Miley - OSO

ACTIVITIES

Construction: Reviewed retention dam site, road construction, water haul road, storage warehouse site stripping operation, and ventilation shaft site locations.

Items of Concern:

1. Top soil pile along large road cut area is no longer in existence.
2. New area being stripped behind mine storage warehouse. All top soil material being wasted in draw, subject to water erosion loss.
3. Retention dam area should have more of alluvium saved and stored with the top soil stock pile.

Items Resolved

1. The top soil was used to cover the road fills for revegetation as planned.
